No. 61 Marine.—The following documents are published for general information and guidance. ●

W. A. INGLIS,
Secy. to the Govt. of Bengal.

Dated Singapore, the 20th April 1906.

From—E. L. BROCKMAN, Esq., Acting Colonial Secretary, Straits Settlements,
To—The Secretary to the Government of India, Home Department.

I AM directed by the Officer administering the Government, Straits Settlements, to forward herewith, for your information, copies of an Act to prevent the landing and leaving of decrepit beggars at the ports of this Colony as recently amended.

2. The Act, it will be seen, imposes on the master or consignee of any vessel bringing such persons to the Colony the liability of either reconveying them to their port of embarkation or paying to this Government the costs that are incurred by the Colony for their maintenance and removal, and also renders the master liable to a fine in the event of their being landed without the leave of the Chief Police Officer.

3. Masters and owners of vessels conveying passengers to the Colony should therefore take precautions against accepting as passengers any persons not natives of the Colony or Federated Malay States who may reasonably be suspected of belonging to any of the classes of persons described in section 1 of the Act, for whose landing in this Colony the consent of this Government has not previously been obtained.

4. I am to request that you will be good enough to cause the provisions of this Act to be known as widely as possible.

STRAITS SETTLEMENTS.

Act XLI of 1850.

As amended by Ordinance IX of 1906.

An Act to prevent the landing and leaving of decrepit beggars in the Settlements of Prince of Wales' Island, Singapore and Malacca.

WHEREAS much public inconvenience has arisen by masters of ships and nakodas of junks and other vessels landing and leaving in the Settlements of Prince of Wales' Island, Singapore and Malacca, diseased, maimed, blind and decrepit persons who afterwards beg for subsistence in the public streets: It is enacted as follows:—

1. All masters of vessels who shall bring and land or cause to be brought and landed in any of the Settlements of the Colony without leave of the Chief Police Officer of such Settlement any diseased, maimed, blind, idiot, lunatic or decrepit person not having the means of subsistence and who may be hindered by his or her diseased, blind or disabled state from earning a livelihood, or any person who cannot show that he has in his possession or that he is physically able to earn the means of decently supporting himself and his dependants if any, or any person who has been banished from any foreign country or has been shipped from any foreign country by the authorities of the Government of such country with a view to his being repatriated other than a person born in the Colony or the Federated Malay States shall, on conviction before a Police Court, be liable for every such offence to pay a fine not exceeding one hundred dollars.

2. Any Police Court upon the complaint of the Chief Police Officer or other officer of Police that any such person who has not resided one month in the Settlement has been found begging or has become chargeable to the Settlement may cause such person to be brought before it, and may examine such person and any other witness on oath touching the place from which he or she was brought to the said Settlement, and may cause any such person to be removed to the place from which he or she was so brought in such manner as shall be from time to time directed by the Governor, and the reasonable cost of such removal shall be borne and paid by the master of the vessel by whom such person was brought to the Settlement and may be sued for and recovered at so much money due from him to Her Majesty.

3. It shall be lawful for any Police Officer not below the rank of Inspector or for any other Police Officer thereunto generally authorized in writing by the Chief Police Officer to enter upon any vessel arriving at any of the ports of the Colony and to detain and inquire into the circumstances of any of the passengers who may reasonably be suspected of belonging to any of the classes of persons whom it is an offence to bring into the Colony under section 1 hereof. If after such inquiry it shall be found that any of such passengers belongs to one of the aforesaid classes, it shall be lawful for the Police Officer to prevent such passenger from landing unless he has obtained the permission of the Chief Police Officer or to detain him until an opportunity arises of returning him to his port of embarkation provided that no passenger able to earn his own livelihood shall be so detained for more than forty-eight hours except on the written authority of a Police Magistrate. If the master of the vessel bringing such passenger is dissatisfied with the result of such inquiry, the question of whether such passenger belongs to any class of passengers which it is an offence to bring into the Colony shall be decided by the Port Health Officer.

4. In cases where a passenger is prevented from landing, the master of the vessel, if returning to the port of the passenger's embarkation, shall afford such passenger a passage free of charge thereto, and in cases where the vessel is not so returning and the passenger is landed and is detained in the Colony, the master of the vessel shall be liable to pay to Government all costs incurred by the Colony for the maintenance of, and removal from, the Colony of such passenger.

5. The owner, agent and consignee of the vessel shall also be liable to pay all such costs and charges to the Government.

6. The master of any vessel which has been boarded by a Police Officer under this Act shall give to such Police Officer any information relating to any passengers suspected of belonging to any of the classes mentioned in section 1 hereof as may reasonably be required for the purposes of this Act.

Master of vessel to give information to Police Officer.

7. The Governor in Council may by order exempt from the provisions of the last preceding section any special class of passengers or voyages or any special vessels, but any such order may be withdrawn at any time at his discretion.

Session, designating it by the date on which it is to commence; and shall be prepared as follows:—

(1) The names of all persons, if any, ordered to be entered in the list of 'Special Jurors' for such Session under Rule VIII, XI or XVI, shall be first entered in the said list, unless the Judge shall be satisfied as regards any one or more of such persons that he or they will be unable, from illness or other sufficient cause, to attend at such Session, in which case the name of such person may be set aside in the same manner as it might have been set aside under Rule VIII, if the name had been drawn by lot for such Session. The Judge shall then cause to be drawn by lot the names of such a number of persons qualified and liable to serve on Special Juries as, with those already on the list, will, subject to the provisions of these rules, make up the number of forty persons qualified and liable to serve on Special Juries, and the names of such forty persons shall be entered upon and form the list of Special Jurors liable to serve and to be summoned as Special Jurors for such Session.

(2) In like manner the names of all persons, if any, ordered to be entered in the Common Jurors' List for such Session under Rule VIII, XI or XVI, shall be first entered in the said list, unless the Judge shall be satisfied as regards any of them that such person will be unable, from illness or other sufficient cause, to attend at such Session, in which case the name of such person may be set aside in the same manner as it might have been set aside under Rule VIII, if his name had been drawn by lot for that Session. The Judge shall then cause to be drawn by lot the names of such a number of persons qualified and liable to serve on Common Juries as, with the names already on the list, will, subject to the provisions of these rules, make up the number of eighty persons qualified and liable to serve on Common Juries, and the names of such eighty persons shall be entered upon and form the list of Common Jurors liable to serve and to be summoned as Common Jurors for such Session.

VIII. The mode of proceeding to draw the names of such Special and Common Jurors, respectively, shall be as follows:—
 Mode of proceeding to draw the names of the Special and Common Jurors to be summoned. The names of all the Jurors in the list of Special and Common Jurors, respectively, prepared by the Clerk of the Crown, shall be numbered consecutively. The number attached in the list of Special Jurors to the name of each Juror liable to be summoned as a Special Juror for the Session for which the list of Special Jurors is to be prepared, shall be written on a bone or ivory counter, the several counters being all, as nearly as may be, of equal size and shape, and such counters shall be put together by the Clerk of the Crown into a box, and, on the day to be fixed for drawing the names of the Jurors, the Clerk of the Crown shall, in open Court, draw, or cause to be drawn, the said counters one after the other, until the requisite number of Special Jurors shall be obtained. The Juror on the Special Jurors' List, whose number on such list shall correspond with the number drawn, shall, subject to the provision in these rules, be entered in the Special Jurors' List for the Session, and a number denoting the order in which the name of each Juror is so drawn shall be set against the name of such Juror in the Special Jury List for the Session.

A similar course, *mutatis mutandis*, shall be adopted in drawing the names of the Common Jurors.

The Judge may order the name of any person who has actually served as a Juror in the preceding year, and of any person known or believed to be dead, absent from Calcutta, or likely to be unable from illness or otherwise to attend, or known or believed not to be qualified or liable to serve as a Juror under these rules, to be set aside; and, in every such case, an additional name shall be drawn in lieu of that so set aside, and the Judge, if he think fit, may order the name of any person so set aside, except on account of death or disqualification, to be entered on the list of Special or Common Jurors, as the case may be, for any subsequent Session to be then fixed.

IX. The names, additions and places of abode of the several persons included in such Special and Common Jurors' Lists for the Session, shall be written therein and numbered in the order in which they shall have been drawn, and such lists shall be signed by the Judge.

X. A copy of such lists shall be annexed to a Precept to the Sheriff, commanding him to summon the first thirty-five on the list of Special Jurors and the first sixty-five on the list of Common Jurors, and in case he shall not be able to summon the whole of the first thirty-five or sixty-five, as the case may be, then to summon as many as shall be necessary to make up the full number of thirty-five or sixty-five of those in numerical order in such lists respectively next after the first thirty-five or sixty-five.

XI. Any person whose name is included in the Special or Common Jurors' List for

Name of Juror excused attending at one Session, on condition of his serving at a subsequent Session to be inserted in the list for such Session.

any Session may apply to the Clerk of the Crown to cause him to be excused from attendance as a Juror, either generally or at the particular Session. Such application shall be made at least one week before the day fixed for the commencement of the Session, and shall specify the grounds upon which the application is made. The Clerk of the Crown shall, as soon as possible after the last day allowed for making such application, bring them before one of the Judges of the Court, and such Judge shall pass orders thereupon, which shall be communicated by the Clerk of the Crown to the respective applicants. If the Judge shall think fit to excuse any of the applicants from attendance at the particular Session, he may do so unconditionally, or on condition of his serving at the next or some subsequent Session to be fixed, and any such conditional order shall operate as an authority to the Clerk of the Crown to include the name of such person in the list for such subsequent Session under the provisions of Rule VI.

XII. Every person named in the lists mentioned in Rule IX shall forthwith, or as

Jurors to be summoned ten days before the first day of the Session.

soon as possible after the receipt of the Precept by the Sheriff, be summoned by him to attend at the Session for which he shall have been appointed to serve as a Juror, and such summons shall be served at least ten days before the first day of the Session.

and to whom access at his office or place of business within such limits is denied to the Sheriff's Officer, as also all notices, orders, or other proceedings required to be served on him, shall, unless otherwise ordered, be addressed to him at his office or place of business aforesaid, or at his place of residence, and forwarded to him by post duly registered. The transmission by post as aforesaid of every such summons, or notice or of a copy, authenticated by the seal of the Court, of every such order or other proceeding, shall, unless good cause be shown to the contrary, be deemed sufficient service thereof.

XIV. In all other cases every such summons, notice, order, or other proceeding,

shall, unless otherwise ordered, be served on a Juror personally.

XV. The Sheriff shall, as soon as possible after service of the summons, and not

later than one week before the commencement of the Session, return the Precept to the Clerk of the Crown, with two panels annexed thereto—one of the Special Jurors and one of the Common Jurors, which panels shall show in a tabular form the names of the persons summoned and the particulars of service upon each; and if any person or persons named in the lists annexed to the Precept shall not have been served, the panel shall state that fact, and the reason why such person or persons has or have not been summoned: and in every case the reason why such service has not been effected shall be verified by the affidavit of the Officer whose duty it was to effect such service, and such affidavit shall be filed with the Clerk of the Crown, with the return to the Precept.

XVI. On the receipt of such return, the Clerk of the Crown shall, without delay,

bring the same before one of the Judges of the Court. The said Judge may, if necessary, examine the Sheriff's Officer or Officers as to the truth of such return, and as to the circumstances of the service or of the absence of service on any person, and may direct service to be made upon the person or persons not already served in such manner as to him shall seem fit. The Judge, if he think fit, may cause the name of any person returned by the Sheriff as not summoned to be entered on the list of Jurors, either Special or Common, as the case may be, for any subsequent Session to be fixed by the Judge.

XVII. If the Judge shall be of opinion that the number of Jurors named in either

of the said lists who shall have been served is not likely to be sufficient, he may cause to be drawn by lot, in the mode provided by Rule VIII, such further number of names as may be requisite not exceeding forty and eighty respectively.

XVIII. Such lists shall be called the Supplemental Lists of Special or Common

Jurors, as the case may be, and shall be prepared and signed in the manner hereinbefore provided with respect to the original lists, and copies thereof shall be sent to the Sheriff with an additional Precept, and the Sheriff shall, as soon as possible after the receipt of such additional Precept, cause the persons named therein to be summoned to attend at the Session, and shall return the Precept to the Court not later than one clear day before the first day of the Session, with a panel similar to that provided by Rule XV in respect of the original lists and Precept.

tried by Jury, the Clerk of the Crown shall cause to be put together into one box cards or pieces of parchment containing the names of all the persons summoned to serve on the Common Jury for the Session, if the trial is to take place before a Common Jury, or on the Special Jury, if the trial is

to take place before a Special Jury, except such of the said persons as shall have been excused by the Judge from serving on that day in consequence of his having served as a Juror on the previous day, or for any other cause. Such cards or pieces of parchment shall be, as nearly as may be, of equal size, and each shall bear the name of one person summoned to serve on the Jury for that Session. The Clerk of the Crown shall then in open Court draw or cause to be drawn out of the said box nine of the said cards or pieces of parchment, one after another; and if any of the Jurors whose name shall be so drawn shall not appear, then such further number shall be drawn until nine Jurors shall appear. The prisoner or person to be tried shall be informed that, if he desires to object to any Juror, he must make his objection before the Juror is sworn. The names of the Jurors shall then be called aloud; and if, upon any challenge or objection either by the Government or the party to be tried, or for any other lawful cause, any Juror is not allowed to serve, or is exempted from serving, the Clerk of the Crown shall draw out another card or piece of parchment from the said box, and so on, until nine Jurors shall have been drawn who shall be allowed to serve.

XX. If, by reason of absence, or disallowance on challenge, or any other cause, there be a deficiency of Jurors, the Court may command the Sheriff, or other Officer, to name or summon a sufficient number of persons to make up a full Jury, and the Sheriff, or other Officer, shall, at such command of the Court, return such men duly qualified to serve as shall be then present, or can be found to serve on such Jury, and the course of proceeding shall be the same as if their names had been returned in the panel and drawn by ballot under Rule XIX; provided that, in case of a Special Jury, the additional Jurors may be taken from the list of Common Jurors summoned to serve at the same Sessions if a sufficient number of Jurors qualified to serve as Special Jurors shall not be present in Court.

XXI. After each Session the Clerk of the Crown shall make an entry in the List of Jurors opposite the names of those who shall have served at such Session or shall have been summoned to serve at such Session, and shall not have made default, together with the date of service, or of the Session for which he shall have been summoned to serve.

XXII. No person shall be summoned to serve upon any inquest before a Coroner unless he is on the Common Jury List, nor, except in the case of necessity, within the period of twelve months after he shall have served on a Coroner's inquest or shall have been summoned to serve on a Coroner's inquest, and shall not have made default. The Coroner shall keep a copy of the Common Jury List, and shall enter therein the names of the persons who shall have served or been summoned to serve and not made default, and the date of the inquest at which such Juror shall have served or for which he shall have been summoned to serve. Dated this 10th May 1906.

- (a) A shoal about 55 yards in extent, with a depth of $2\frac{1}{2}$ fathoms over it, situated in approximately lat. $6^{\circ} 4' 30''$ S, long. $106^{\circ} 51' 55''$ E. Also that the black buoy with a conical topmark, marking Brunda shoal, is moored on the southern side, and not on the northern side of that shoal as shown on the chart.

Approximate position, lat. $6^{\circ} 4\frac{1}{2}'$ S., long. $106^{\circ} 55\frac{1}{2}'$ E.

This Notice affects the following Admiralty Charts:—Sunda strait, No. 2056; Batavia road, No. 933; Also Eastern Archipelago, Part II, 1904, pages 88, 89.

No. 203 (first publication).—With reference to Notice to Mariners No. 160, dated 12th May 1906, issued by this office, the British Admiralty has given further notice (No. 449 of 1906), that on March 31st the two white fixed lights at Pagurawan river were replaced by a white group occulting light every thirty seconds, thus:—light, three seconds; eclipse, three seconds; light, twelve seconds; eclipse, twelve seconds. It is elevated 49 feet above high water, and visible in clear weather from a distance of 12 miles. The light, which is of the 4th order, is exhibited from an iron lattice structure, 42 feet high, painted white, erected in the same position as the former lights.

Approximate position, lat. $29^{\circ} 24\frac{1}{2}'$ N., long. $48^{\circ} 4'$ E.

NOTE.—It is evident from the soundings obtained by the *Sphinx* when compared with the recent survey that the track followed must have been far closer to the shore than suspected at the time.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FOURTH QUARTER OF 1905-1906.

No. 3341B., dated Calcutta, the 26th May 1906.

From—PANDIT RAMA BALLABHA MISRA, M.A., Offg. Secretary to the Board of Revenue, L. P.,

To—The Secretary to the Government of Bengal, Financial Department.

I AM directed to submit the following report on the state of the salt market for the fourth quarter of the year 1905-1906, comprising the months of January, February and

Member in charge :

THE HONBLE MR. W. O. MACPHERSON, Esq., C.S.I.

March 1906.

2. The quantity of salt of every description cleared during the quarter amounted to 23,66,672 maunds, as compared with 26,68,975 maunds in the previous quarter, and 25,23,814 maunds in the corresponding quarter of the previous year. The net amount of duty levied thereon was Rs. 32,87,095, as against Rs. 35,79,211 in the previous quarter, and Rs. 44,37,557 in the corresponding quarter of the previous year.

3. The subjoined Table I shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter, as compared with the figures of the corresponding quarters of the two previous years :—

**ANNUAL REPORT OF THE PATENT OFFICE, DURING THE
CALENDAR YEAR 1905.**

The 7th June 1906.—The following papers are published for general information.

R. W. CARLYLE,
Chief Secy. to the Govt. of Bengal.

No. 1687P., dated Calcutta, the 26th April 1906.

From—H. G. GRAVES, Esq., Secretary under the Inventions and Designs Act,
To—The Secy. to the Govt. of India, Dept. of Commerce and Industry.

I HAVE the honour to submit, for the information of the Government of India, the annual report of the Patent Office during the calendar year 1905.

2. The office has been in my charge during the year. Formerly it was under the direction of an officer who had other duties to perform, but a change was made in 1904 by the determination of the Government of India to appoint a whole-time officer with some knowledge of the working of the English Patent Law. A further change was made in February 1905 by the transfer of the office from the Department of Revenue and Agriculture, of which it had been a branch since 1888, to the newly formed Department of Commerce and Industry. Shortly afterwards, in May, the Secretary under the Inventions and Designs Act was appointed *ex-officio* to be Assistant Secretary to the Government of India in the new Department. The office was housed during the year in the Imperial Secretariat Buildings, but during the Christmas holidays it was removed to its present quarters at 2, Bankshall Street, Calcutta.

3. With more time than was previously at the disposal of the Patents Secretary, it has been found possible to introduce certain changes in practice and to bring forward preliminary propositions for the amendment of the Act and for printing specifications of inventions. The latter has been accepted, but the carrying of it into effect has been postponed until the major question of the Act has been more fully considered. The changes that have been made, however, though perhaps of minor importance, are intended to encourage the inventor and to protect both the inventor and the public. They have, it is believed, been received with approval. Interviews with the Patents Secretary are more freely accorded both to patent agents and inventors. Efforts have been made to obtain improved descriptions and drawings of inventions. In case the rejection of an application appears to be necessary under the Act, the applicant is afforded, in the majority of cases, an opportunity of showing cause for acceptance of his application in the original or in an amended form. Opponents to applications are also given an improved status by an offer to hear their objections in the presence of the applicant. Reminders are now issued for the payment of renewal fees; from letters received in the office it would appear that they are appreciated and have avoided the lapse of several exclusive privileges through oversight by their holders. To facilitate the issue of these reminders, a card index has been adopted. These and other changes, of which the full effects will not appear until next year, though accompanied by a simplification in the routine work of the office in other respects, have entailed a considerable amount of work in which the staff has loyally co-operated.

4. During the year 1905 the number of applications for leave to file specifications reached 586 as compared with 552 in the previous year. The increase was 34, or 6 per cent., more than double that shown in 1904, and the advance has gone on steadily since the Act came into operation. In 1899 there were only 336 applications and the total number under the present Act has been 7,724. In the year under consideration, 214 applications were made by residents in India, 71 being filed by natives. The remaining 372 came from outside India, distributed as follows:—United Kingdom 197, United States of America 68, British Colonies 41, France 23, Germany 18, Switzerland 6, Belgium 5, Holland 3, Denmark 3, Sweden 2, Austria 2, Italy 1, Norway 1, and Russia 1. Local invention, it will be seen, does not bulk very largely in the total, but it shows a small increase, and it is very noteworthy that the marked increase of last year in the number of native inventors has been more than maintained.

5. As usual the range of inventions for which protection is sought covers

short time available, and, in fact, only one out of the four inventions for looms was devised by a native of India. Subsequent events have shown that the native is busy in this direction, and several applications for protection have been made for looms and their appurtenances. As this matter is of such particular interest at the moment, it may be of interest to consider specially the inventions made by Hindus and Muhammadans in this country. It was stated above that 71 applications were made during the year by them. Of these nine were concerned with methods of lifting water exclusive of five for sluices and modules, and eleven appertained more or less directly to lamps. Three applications were made in each of the following subjects:—ginning cotton, preparing fibre other than cotton, warping machines, road vehicles, sugarcane mills, hockey sticks. The following matters also formed subjects for one or two applications:—food, drink, disinfectant, road ramming machine, drying tea, hulling rice, fuel, oil-mill, hay press, wire ropeway, bicycle, perfume diffuser, latrine, brick kiln, cigarette manufacture, windmill, harness, ink, lock nut, safe, curtain, loom, colour, chaff-cutter. Many of these alleged inventions are of the most elementary character and a reference to the history of the subject shows that more efficient means of an equally simple character were proposed long ago and abandoned in favour of more complicated machinery arranged to have automatic action and to be driven by power. This is especially true of textile machinery, and it becomes a serious question whether many of the recent proposals can really be considered as subject matter for valid patents.

6. Of the 586 applications made during the year, leave to file a specification was granted in 339 instances and refused in 25, whilst 10 were treated as abandoned and 112 were under or awaiting consideration on the 31st December 1905. The refusals, as will be seen in the annexed tables, were 7 fewer than in 1904 and 23 fewer than in 1903. This may be ascribed to the greater facilities now given to applicants for correcting their applications. To the same cause is mainly due the greater number, 112 as compared with 84, of applications on which orders had not been passed at the end of the year.

7. The number of references to experts, departmental and otherwise, has been reduced from 137 to 25 in view of the orders that such references were to be discontinued except in cases which were likely to affect native industries or which concerned the more ignorant classes of the population.

8. The number of specifications filed during the year was 467, a decrease of one as compared with the previous year. Of these, 293 were filed on applications made in 1904, and two on applications made in 1903, while the remainder, 262, were filed on applications made in the year under consideration. As the result of 7,724 applications under the present Act, 5,856 were filed and brought on the register up to the end of 1905. Detailed calculations, of which the results were given in the last report, showed that 80.1 per cent. of the total number of applications, or 88.4 per cent. of those on which leave was granted, are followed by specifications.

9. Exclusive privileges were kept alive by payment of prescribed fees in 552 cases, or 35 less than in the previous years, whilst 384, or 31 more than in 1904, ceased owing to non-payment of fees. Of the 5,856 specifications brought on the register, 2,305 are now in force, an increase of 73 as compared with 2,232 at the end of last year. The comparative age and number of these privileges for various years is shown in the appended table. The average life of a privilege is slightly over 6½ years.

10. Applications for the registration of designs have fallen off again, only 15 being received as compared with 32 in 1904. Of these eight were refused or abandoned. Altogether 26 designs were registered, including 17 on applications held over for consideration from 1904.

11. Only one reference was made to the law officers during the year. Both in 1903 and 1904, three references were made.

12. The gross revenue for the year amounted to Rs. 54,766-12 as compared with Rs. 58,043-10 in 1904, a decrease of Rs. 3,276-14. No refunds were required as in the previous year, so that the total net income shows a decrease of only Rs. 2,995-1. On the face of it, this is not satisfactory, but it is accounted for by the exceptional amount of Rs. 6,300 paid in advance in March 1904 on account of continuance fees. In March 1905 only Rs. 2,650 was received, and the average monthly return under this heading is Rs. 2,760. That exceptional amount was really robbed from the year under consideration, and if it had been properly distributed 1905 would have shown a slight advance.

Statement showing the proceedings under the Inventions and Designs Act of 1889 for the year 1905 as compared with the years 1904 and 1903.

NEW ZEALAND INTERNATIONAL EXHIBITION, 1906.

The following papers are published for general information.

The 7th June 1906.

R. W. CARLYLE,
Chief Secy. to the Govt. of Bengal.

Nos. 3917—3937-10, dated Simla, the 23rd May 1906.

RESOLUTION—By the Govt. of India, Dept. of Commerce and Industry.

The following papers relative to the Exhibition, which will be held at Christ Church in New Zealand in November 1906, are published for general information. The Government of India have decided not to participate in the Exhibition.

NOTICE.

The Government of New Zealand has decided to hold, during the summer of 1906-07, an

International Exhibition

at Christ Church, Canterbury, New Zealand, in which all the nations of the world have been invited to participate. The object of the Exhibition is educational, and it is intended to demonstrate the resources and possibilities of the Colony as one of the world's food-producing factors; its vast mineral resources; and to draw attention to its unrivalled and varied scenery, thermal wonders, and also the exceptional opportunities offered to sportsmen;

And, further and specially

to bring under the notice of the more industrial nations of the world the great field the Colony of New Zealand offers as an outlet for enterprise and for the use and consumption of all manner of up-to-date appliances, manufactures, etc.

New Zealand's imports.

Such an Exhibition should command the support and attention of all the manufacturing nations of the world, and, if taken advantage of, must accomplish tangible and satisfactory results. The Colony of New Zealand, being essentially a producing country, offers a splendid outlet for the manufactures of other countries which pay more attention to the development of manufacturing industries and whose industrial conditions and facilities are better adapted to the promotion and development of manufacturing.

The imports of the Colony for the past year (at least three-fourths of which are manufactured goods) amounted to £13,292,000 received from the following countries:—

| | £ |
|------------------------------------|-------------------|
| Great Britain | 7,982,000 |
| Commonwealth of Australia | 1,893,000 |
| United States of America | 1,528,000 |
| Fiji Islands | 167,000 |
| Germany | 808,000 |
| India | 290,000 |
| Ceylon | 173,000 |
| Belgium | 120,000 |
| Canada and British Columbia | 118,000 |
| Japan | 85,000 |
| France | 55,000 |
| Singapore | 37,000 |
| Pacific Islands | 30,000 |
| Holland | 29,000 |
| China, including Hongkong | 21,000 |
| Italy | 19,000 |
| Asia Minor | 17,000 |
| Sweden | 16,000 |
| Greece | 14,000 |
| Phillipine Islands | 10,000 |
| Java | 5,000 |
| Other Countries | 29,000 |
| Total ... | 13,292,000 |

When it is considered that this immense expenditure on imports is required for the use and consumption of a colony with a population of 850,000 persons, it can be readily understood what a rare opportunity there is for exploiting this Colony with up-to-date manufactures.

The prosperous condition of New Zealand and the equal distribution of wealth, places every one in a position to indulge in a fair degree of comfort, and anything in the way of an improvement in the existing conditions is welcomed and substantially supported. The sparsity of the population provides an exceptional market for all labour-saving machinery in every department of agricultural, pastoral, and domestic life.

These features of the possibilities of Exhibition are confidently placed before the more industrial nations of the world. Therefore manufacturers are urged to appoint representatives and to send such exhibits as will show the nature and finish of their work, and which are suitable for a colony which is progressing with almost unparalleled rapidity, and which has the keenest desire to adopt the most modern ideas and conveniences of advanced civilisation.

New Zealand as a food-producing country.

The resources and possibilities of the Colony of New Zealand as a food-producing country promise so much that it is without any apology that the Government desire to bring it under the notice of those interested in transporting, importing, and otherwise handling the food stuffs of the world.

It is only necessary to instance the rapid growth of the development of the **NEW ZEALAND FROZEN-MEAT INDUSTRY** and the splendid service of mammoth refrigerator steamers dependent thereon; the **DAIRYING INDUSTRY**, which has now reached proportions beyond the most optimistic expectations, and which is still only in its infancy. The fortnightly shipments of **BUTTER AND CHEESE** to London during the past season ranged from 1,500 to 2,000 tons, carried in one bottom.

New Zealand's raw materials.

As a market in which to procure supplies of raw materials, of quality unequalled in the world, our *annual export of wool, hemp, skins and hides, kauri-gum, and coal* have only to be mentioned to induce purchasers of these staples to attend and investigate the sources of production:

| | £ | | £ |
|---------------|-----------|-----------|---------|
| Wood ... | 4,673,826 | Hemp ... | 710,281 |
| Kauri-gum ... | 501,817 | Coal ... | 139,893 |
| Skins ... | 444,821 | Hides ... | 53,431 |

New Zealand's mineral wealth.

The mineral wealth of this naturally endowed Colony is demonstrated by the continuous and increasing output of **GOLD**, which during the past fifty years has totalled in value

the immense sum of £65,000,000.

In this industry alone there is an opening for investment which is not offered by any other part of the world under such secure conditions.

The surfaces of the gold-bearing parts of the Colony have only been "scratched over," and there are immense possibilities and discoveries awaiting enterprise combined with scientific and up-to-date methods of prospecting with a view to tracing the supplies of **GOLD** to their original sources.

LARGE DEPOSITS OF IRON-SAND AND IRON-ORE are available within the Colony, and these await the enterprise and attention necessary to development; and, in convenient proximity, are **THE COAL-MINES OF NEW ZEALAND**, producing coal of quality equal to the best in the world, and for which an over-sea trade has yet to be initiated and developed.

New Zealand as a tourist resort.

As a resort for tourists and sportsmen, the Colony of New Zealand offers an interesting opportunity at a cost which compares favourably with similar opportunity in any other part of the world.

DEER-STALKING,
GREYERS,
SCENERY,

TROUT-FISHING,
HOT AND COLD LAKES,
SOUNDS, SHOOTING,

ALPINE-CLIMBING,
SUPERB MOUNTAIN,
ROAD AND RIVER SCENERY,

unsurpassed in the world, are available to every one who can find time to visit the Colony; and not necessarily only to wealthy people, because every attraction is available to people of ordinary means, on account of the moderate charges for travelling and accommodation, and for participation in the available sport.

Duty and freight.

Special arrangements will be made with the steamship companies trading to New Zealand whereby exhibitors will obtain *special rates of freight on exhibits*, and complete arrangements will be made for the *reception and installation of exhibits* on such lines as will protect exhibitors from any excessive charges.

The Exhibition buildings will be constituted a *bonded warehouse* for the time being. All goods sold will be *plus duty*, whilst all over-sea exhibits that may be returned can be reshipped *free of duty*.

The Exhibition grounds and buildings.

The grounds and buildings will be lighted by ELECTRICITY AND GAS, and as electricity and lighting in almost every form will be a prominent feature of the Exhibition, every facility will be extended to exhibitors to display the latest developments and designs.

Each nation participating will be allotted a special court, irrespective of the class of exhibits shown, except in the case of artificial manures in bulk, and machinery in work requiring to be supplied with motive power.

These classes will be allotted separate buildings.

Arts and crafts.

Particular attention will be devoted to arts and crafts in actual operation, and every reasonable facility will be given to exhibitors who desire to MANUFACTURE GOODS IN THE EXHIBITION.

Awards.

Awards in the form of diploma of gold and silver medals, according to merit, in each section, to exhibitors who desire to compete. These awards should prove of great value to successful firms, as care will be taken to select competent and unbiassed judges.

Railway and steamer concessions.

Special rates for coastal, over-sea, and Railway passenger fares will be arranged, so as to encourage the presence of visitors, and popular excursions will be promoted continuously to all the principal places of interest in the Colony. Every facility will be provided, not only to attend the Exhibition, but at the same time to visit the scenic, thermal, and other attractions in various parts of the Colony.

Costents and games.

INTERNATIONAL BAND CONTESTS,
BOWLING TOURNAMENTS.
RACE MEETINGS AND REGATAS,
VOLUNTEER ENCAMPMENTS AND MILITARY
SPORTS.

ATHLETIC SPORTS,
AQUATIC SPORTS.
CRICKET MATCHES,
POLO MATCHES,

FIRE BRIGADE DEMONSTRATIONS AND SPORTS,
AGRICULTURAL AND PASTORAL AND STOCK SHOWS,

FOOTBALL MATCHES,
GOLF TOURNAMENTS,

will be arranged in suitable continuation during the progress of the Exhibition. Educational competitions will also be instituted with a view to promote and illustrate progress in music and art.

The mean pressure, temperature, &c., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the New Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

Every passed candidate will, before appointment, be required to undergo a further examination as to his physical fitness by the Medical Board sitting at Calcutta, and will not be appointed unless the Board certifies him to be in all respects physically fit to work as a Pilot on the Hooghly.

4. He must have served at sea for four years in a merchant sailing vessel of not less than 300 tons register, employed in the foreign trade, as a seaman or apprentice, and must produce satisfactory certificates from the Masters he has sailed under.

5. Before being admitted to the examination, the candidate will have to satisfy the Examiners that he has passed the Middle Scholarship Examination under the Code of Regulations for European Schools, or that he has passed the Calcutta University Entrance Examination. Candidates will be examined in Navigation and Seamanship up to the standard of a 2nd Mate in the Merchant Service.

6. He will on being appointed to the service receive Rs. 100 per mensem.

7. A Leadsman Apprentice will go through such a course of training and pass such examinations as the Government of Bengal may from time to time prescribe. He will, whilst in this grade, receive a salary of from Rs. 100 to Rs. 150 a month, in accordance with the duty on which he is employed. He will also receive such share of the lead-money paid by the ships on which he does duty as may from time to time be fixed by the Government of Bengal.

8. After five years' service as a Leadsman Apprentice he will be allowed to go up for an examination to qualify for appointment as Mate Pilot, and, if successful, he will be promoted to that grade on the occurrence of a vacancy. While remaining as a Leadsman Apprentice, after passing this examination, he will receive a salary of Rs. 175 a month.

9. After three years' service as Mate Pilot, he will be permitted to go up for an examination to qualify for appointment as Master Pilot, and, if successful, he will be promoted to that grade on the occurrence of a vacancy.

This rule does not apply to Mate Pilots who entered the service without a 2nd Mate's Certificate of Competency. Such officers will be required to serve four years as Mate Pilot before being eligible for permanent promotion.

10. Vacancies which occur in the grade of Branch Pilot will be filled up by promotion from the Master Pilots' grade, of men who have passed the Branch Pilots' examination.

11. Branch Pilots and Pilots who have passed the Branch Pilots' examination, will, while under 55 years of age, be examined at intervals of three years by the Marine Surgeon with respect to their eyesight and general physical fitness for the performance of their duties. All Pilots who continue in the service after attaining the age of 55 years will be similarly examined every year.

12. If the Local Government has reason to believe that a Pilot is, owing to physical unfitness of any kind, incapable of discharging his duties properly, it shall arrange for his medical examination, and shall take such action as may seem desirable when the results of that examination are communicated. In particular, Pilots shall be medically examined after the occurrence of any accident to the vessels in their pilotage charge, if the circumstances tend to show that the accident was in any way attributable to physical unfitness on the part of the Pilot.

13. Pilots are not entitled to any salary while on pilotage duty, but receive as their remuneration a share, at present 50 per cent, but liable to alteration at the discretion of the Government of Bengal, of the pilotage dues paid by ships piloted by them.

14. The Government of Bengal reserves to itself the right to require all Pilots to obtain a Home Trade Master Mariner's certificate before they are promoted to be Senior Master Pilots.

15. Every member of the Pilot Service is subject to such rules as the Government of India, or as the Government of Bengal under the control of the Government of India, may from time to time respectively make in regard to discipline, leave, leave allowances, number of officers in the service, distribution into grades, tonnage of ships to be allotted to the several grades, etc., and in all respects he is amenable to such orders as may be passed by the Government of Bengal, and is liable to degradation, suspension and dismissal, by the Government of Bengal, for any breach of such rules or orders, or for misconduct.

16. The principal leave and pension rules at present in force are contained in Chapter XXXIII of the Civil Service Regulations, fourth edition, and are summarised in Chapters XXXI and XXXII of the Code of Regulations for the Bengal Pilot Service; but it is to be understood that the rules are subject to alteration at the discretion of the Government of India. Every candidate for admission to this Department must apply in writing to the Principal not later than the 14th July. The form of application for a nomination, which must be addressed to the Principal, is given in Appendix B. In the event of the form not being properly filled up and accompanied by the necessary certificates, no notice will be taken of the application.

The session begins on the first Monday in November. All students are required to join the College on that day. Any student prevented by sickness from attending on the opening day must produce a certificate to that effect from a Civil or Assistant Surgeon, failing which he will be liable to a fine not exceeding Rs. 10. SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN EASTERN BENGAL AND ASSAM, FOR THE MONTH OF MAY 1906.

The month of May has been characterised, as will be seen below, by deficient rainfall and marked oscillations of pressure and temperature above the normal. At the beginning of the month a trough of low pressure along the Himalayas seems to have dominated the winds at the head of the Bay, and it was not till the end of the first week that the westerly motion of this low pressure area gave a more southerly direction to the winds and allowed moist air from the Bay to penetrate into Bengal. As a consequence of this change, general rain fell in Lower Bengal and Assam during the course of the second week, and in the third week the area of precipitation extended into Bihar and Chota Nagpur. A rapid fall of temperature was associated with the rainfall in Bengal, Chota Nagpur, Bihar and Orissa, the deficiency reaching about 12° in Bihar on the 19th of the month. In the south of the Bay conditions assumed a slightly threatening aspect owing to the formation of a shallow depression off Madras on the 15th of the month. This area of low pressure, however, after remaining stationary for two or three days slowly diffused without exercising any marked influence on the weather in the Bay. During the latter portion of the month the most striking features were the abnormally low pressure at the head of the Bay, steep gradient to the south, accompanied by a premature northward advance of the monsoon conditions. There was evidence of the formation of a depression in front of the advancing current, and on the 27th the cautionary signal was hoisted in the river ports. The disturbance in question was not a serious one, but its existence appears to be substantiated by the Commander of the vessel *Zibenghka*, who reported having passed through a small regular cyclone in Lat 70° N. and Long. $90^{\circ} 30'$ E. on the 27th. The depression filled up rapidly on the 27th, possibly drifting in an eastward direction into Lower Burmah, where heavy rain was reported. The same conditions, viz, low pressure at the head of the Bay and the steep gradient, prevailed to the end of the month.

Summary of Pressure.—Pressure at the end of the month was in general excess, except along a narrow strip to the north of the Province. The earlier part of the month was marked by oscillations of pressure of fairly large amplitude to the north of the area under report, the barometer standing about one-tenth of an inch above normal on the 7th of the month and falling to a tenth of an inch below normal on the 9th. On the 17th a very rapid rise of the barometer occurred in Bengal, and this was followed by a gradual fall during the next few days, when the pressure became normal once more. Pressure was at this point very uniform over the Bay, but from the 24th onwards the gradient commenced to get steeper. This was caused mainly by the steady fall of the barometer over the north of the area under report, which continued till the end of the month, leaving an abnormally heavy defect, which reached as much as a quarter of an inch at Akyab.

Summary of Temperature.—Mean temperature has again been in general excess by small amounts during the greater part of the month. The average mean of the month was about normal in Assam and East Bengal and above normal at the other Meteorological Divisions. Maxima of over 114° were recorded in South-West Bengal, Bihar, Orissa and Chota Nagpur.

Summary of Rainfall.—Rainfall has been in general defect throughout the whole Province. Broadly speaking, the defect has been greater in Chota Nagpur and South Bihar, the districts of Gaya, Patna and Shahabad recording less than 40 per cent. of the normal amount for the month, and Hazaribagh, Palamau and Manbhum recording less than 50 per cent. In Sambalpur one-tenth of an inch only fell during the whole month. Jessore, Darbhanga and Monghyr were the only districts in the Province which received more than the normal amount. Little or no rain fell till the 10th of the month, except in Darjeeling and Thibet. In South-West Bengal rain was fairly general from the 10th to the 21st, when it diminished somewhat. In Orissa and Chota Nagpur scattered rain fell from the 10th to the end of the month. The greater part of the rain, which fell in Bihar and Bhagalpur, occurred between the 17th and the 24th.

The following table gives full data for comparison of the actual and normal rainfall of the month of May for all districts of the Province. The figures are derived from the average and actual rainfall of the rain-reporting stations in each district. The first column gives the normal or average district rainfall as determined from the observations of past years. The second column gives the actual district rainfall as determined from the actual rainfall of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage. The fourth column gives the same information as the third, in a slightly

different form, stating as a percentage how much the district rainfall of the month varied in excess or defect from the normal:—

The mean pressure, temperature, &c., are deduced from the traces of the barograph and thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the New Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

t, thunder; <, lightning; p, passing temporary showers; d, drizzling rain; o, overcast; /, strong wind.

PLAGUE REGULATION F.

The 23rd June 1906.

IN exercise of the powers conferred by section 2 of the Epidemic Diseases Act, 1897, and by the notification of the Government of India in the Home Department No. 302, dated the 4th February 1897, the Lieutenant-Governor is pleased to prescribe the following rules for preventing the spread of plague and other dangerous epidemic disease by persons travelling by river steamer within the territories under the administration of the Lieutenant-Governor of Bengal.

1. (1) Whenever any case of plague, small-pox or cholera occurs on board a river steamer, the Medical officer of the steamer or, where there is no such Medical officer, the *serang* shall immediately,—

- (a) remove the patient, together with his bedding, drinking utensils and food, to a part of the deck at the extreme stern of the steamer, where he shall be segregated from the rest of the passengers by a *purdah* or awning;
- (b) cause all excreta, vomit and urine which may have been discharged on to the deck by the patient to be cleaned away with a solution of phenyle; and
- (c) report the case to the Subdivisional or District Magistrate within whose jurisdiction the nearest ghat lies, and also to the Civil Surgeon of the district.

(2) Where such ghat is not at the head-quarters of a subdivision or district, the report mentioned in sub-clause (c) of clause (1) shall be sent by the Medical officer of the steamer, or the *serang*, as the case may be, by the most expeditious means available to the next head-quarters of a subdivision or district at which the steamer will touch.

2. If, when the case occurs, the steamer is lying at a ghat at the head-quarters of a subdivision or district, or otherwise, when the steamer has reached the nearest ghat which is at such head-quarters, the *serang* shall not move the steamer therefrom until permission has been given by the District or Subdivisional Magistrate, or by the Medical officer under rule 8.

3. (1) On receipt of the report mentioned in rule 1 the Magistrate or Civil Surgeon shall at once depute a Medical officer to inspect and disinfect the steamer.

(2) Such Medical officer shall visit the steamer, and if a suitable hospital is available, or if other satisfactory arrangements can be made for his treatment and segregation, shall bring the patient to land.

4. Where no such hospital is available and no such arrangement can be made the patient shall not be allowed to land, but the Medical officer deputed under rule 3 shall take steps to ensure the proper segregation of the patient on the steamer and to satisfy himself that every possible precaution has been taken to prevent the spread of the disease.

5. The Medical officer deputed under rule 3 shall in all cases cause the deck, cabins, latrines and any other part of the steamer where the patient has been to be thoroughly washed down with a strong solution of phenyle, and all utensils which have been used by the patient to be disinfected.

6. (1) In case of death, the body of the patient shall be made over to his friends, or where he is without friends to the police, who shall arrange for its disposal.

(2) The clothes of the deceased (except those in his baggage), his bedding and all food in his possession shall be burnt unless orders to the contrary are passed by the Medical officer.

7. The Medical officer deputed under rule 3 shall ascertain the names and addresses of all members of the party accompanying the patient, and shall report them through the Magistrate to the Magistrate of the district to which they are proceeding.

8. When the orders contained in these rules have been complied with, and the Medical officer deputed under rule 3 is satisfied that there is no reason further to detain the steamer, he may give permission to the serang to proceed on the journey.

9. The owner of every steamer shall be bound to keep on board each steamer a two-gallon drum of phenyle.

10. The patient may be permitted to land on the expiry of a period to be fixed by the Medical officer deputed under rule 3.

For admission to the Higher Agricultural Class, an applicant must have one of the following qualifications:—

- (I) He must have passed the F.E. Examination of the Calcutta University, and be under 23 years of age, but no student will be allowed to join the Agricultural Class after the expiration of five years from admission into the Engineering College.
- (II) He must have passed the B.A. Examination of the Calcutta University by the B course or possess other sufficient educational qualifications; be under 23 years of age, and, in addition, have received a nomination from the Bengal Government.

(III) He must have had a general education qualifying him to follow the instruction in the Higher Agricultural Class, and must also receive a nomination from Government for admission as a special student. To be eligible for a nomination under this rule, a candidate must either have landed property of his own or be recommended by some influential landholder who desires to train him to take part in the management of his estate, or he must otherwise satisfy Government that he intends to make practical use of his agricultural training. Students entering under this rule will be termed Special Agricultural students. They will not be subject to any maximum limit of age, but will not be entitled to the privileges conferred on passed students under rules 12 and 13, even though they should obtain fully signed diplomas in due course after passing the necessary examinations.

Every candidate for admission to this Department must apply in writing to the Principal not later than the 14th July. The form of application for a nomination, which must be addressed to the Principal, is given in Appendix B. In the event of the form not being properly filled up and accompanied by the necessary certificates, no notice will be taken of the application.

The number to be nominated each year will depend on the accommodation available.

Every applicant, not already a student of the College, must undergo a medical examination by the College Surgeon before admission to this Department. If this officer's report is unsatisfactory, the applicant will not be admitted.

The session begins on the first Monday in November. All students are required to join the College on that day. Any student prevented by sickness from attending on the opening day must produce a certificate to that effect from a Civil or Assistant Surgeon, failing which he will be liable to a fine not exceeding Rs. 10. No student will be admitted or re-admitted to the College after the month of November, except by special orders of the Director of Public Instruction. This permission will only be given under exceptional circumstances.

Course of Instruction.

The course of instruction in the Higher Agricultural Class will extend over two academic years.

Scholarships.

Senior scholarships awarded in the Engineer Department are tenable in the Agricultural Department.

One scholarship of Rs. 30 a month, tenable for one year, will be awarded on the result of the examination held at the end of the first academic year.

Appointments.

Two appointments annually are assigned to students holding a fully-signed diploma—one in the Provincial Executive Service and one in the Subordinate Executive Service. The right of selection for these appointments will rest with Government, and the students who gained the highest marks at the examination for diplomas will not necessarily be selected.

Entrance and Tuition Fees.

Each student in the Higher Agricultural Department will be required to pay an admission fee of Rs. 10.

F. E.'s who elect to join the Agricultural Department immediately after passing the F. E. Examination are exempted from the payment of this fee, as their names are already borne on the College books.

For the present no tuition fees will be charged to students in the Agricultural Department, except in the case of those joining as special students under rule 3 (iii). The tuition fees for these students will be Rs. 8 a month.

- (b) A shoal about 65 yards in extent, with a depth of 7 feet over it, situated in approximately lat. 6° 4' 0" S., long. 106° 51' 15" E.

Note.—Shoals (b) and (c) are separated from each other and from Vader Smit shoal by depths of 7 fathoms.

Also that the black buoy with a conical topmark, marking Brunda shoal, is moored on the southern side, and not on the northern side of that shoal as shown on the chart.

Approximate position, lat. 6° 4½' S., long. 106° 55½' E.

RESOLUTION ON THE ANNUAL REPORT ON EMIGRATION FROM THE PORT OF CALCUTTA TO BRITISH AND FOREIGN COLONIES FOR THE YEAR 1905.

GENERAL DEPARTMENT—EMIGRATION.

Darjeeling, the 18th June 1906.

RESOLUTION—No. 945T.—G.

READ—

The Annual Report on Emigration from the Port of Calcutta to British and Foreign Colonies for the year 1905.

No administrative measures of any importance were adopted by this Government during the year under review. The Governments of Natal and Jamaica, however, amended the laws in those Colonies relating to Indian immigrants. The amendments made are not of sufficient importance to require specific mention. Information was received from the Emigration Agent for Mauritius that the rate of wages payable in the Colony to indentured adult male immigrants had been raised from Rs. 5 rising in five years to Rs. 7, to Rs. 6 rising in five years to Rs. 8.

2. Seven emigration agencies were at work during the year, of which six represented British Colonies and one the Dutch Colony of Surinam. The total number of emigrants registered was 15,296, being an increase of 5,010 over the number registered in 1904. The bad harvests and the consequent rise in the price of food-grains in the recruiting districts contributed to this result. As usual, recruitment was most active in the United Provinces of Agra and Oudh, from which 76·39 per cent. of the emigrants came; Cawnpore, Fyzabad, and Basti supplying the largest number. Fifteen thousand three hundred and fifty-two emigrants were accommodated in sub-dépôts during the year, of whom 2,296 were rejected, which was a larger number than in the previous two years. This fact points to the exercise of more care in the medical inspections conducted up-country. Twelve thousand two hundred and ninety-six persons arrived at the Calcutta dépôts, but the number was reduced by rejections, releases, and other causes to 9,943. Of these, 9,322 were shipped during the year and 621 were left for subsequent despatch. The figures show an increase in comparison with those for 1904, when 7,451 persons were accommodated in the Calcutta dépôts and 7,135 actually took ship to the Colonies. In 1903 the number who embarked was 9,084 and in 1904 it was 10,882.

The sanitary arrangements of the dépôts at Garden Reach were satisfactory throughout the year, and the intending emigrants were well cared for.

3. The demand for labour increased, 8,157 immigrants being requisitioned as against 7,501 in the previous year. This was partly due to the fact that recruitment for Jamaica, which had been suspended in 1904, was resumed in 1905, 790 emigrants being despatched to that Colony. The number of labourers supplied was 8,933, or 776 more than the demand. This year there was less difficulty in securing labour owing to scarcity in the recruiting districts. The Colonies which received the largest number of emigrants were Demerara (2,605) and Trinidad (2,285).

4. The accounts of the Emigration Fund show that the year closed with a surplus balance of Rs. 1,778-11-8. This surplus is due partly to the increase of receipts on account of the larger number of emigrants embarked during the year, and partly to the inclusion in the receipts of the sum of Rs. 3,283-8-5, which represents the unclaimed estates of deceased emigrants.

5. During the year 4,703 immigrants returned to India, bringing with them savings amounting in the aggregate to Rs. 8,08,141-2-4, or, on an average, to Rs. 171-13-4 a head, as compared with Rs. 174-10 a head in the preceding year. It is noteworthy that the percentage of money saved in Trinidad is far in excess of anything saved in any other Colony. One thousand and seventy-eight adults brought back no savings. As in previous years, the labourers in Natal sent the largest remittances by money-order, the total amount so sent being nearly 14 lakhs.

6. The thanks of the Lieutenant-Governor are due to Dr. Banks for his careful administration and report. This officer acted as Protector of Emigrants throughout the year, with the exception of one month when he was on leave.

By order of the Lieutenant-Governor of Bengal,

T. W. RICHARDSON,
Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1905.

POLITICAL DEPARTMENT—POLICE.

Dated Darjeeling, the 22nd June 1906.

RESOLUTION—No. 1072P.—D

READ—

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs for the year 1905.

Read also—

The Reports for the two previous years and the orders of Government recorded thereon.

The office of the Commissioner of Police was filled by Mr. R. A. D'O. Bignell from the 1st of January to the 20th of April, when he went on leave. He was subsequently compelled by the state of his health to retire. The Lieutenant-Governor desires to express his regret at Mr. Bignell's retirement and to convey the thanks of this Government for his valuable services. Mr. F. L. Halliday, who had been officiating during his absence, was confirmed with effect from the 14th December. The Commissioner had the advantage of the assistance of Mr. F. C. T. Halliday, who officiated as Deputy Commissioner during eight months of the year and who was after that confirmed as Deputy Commissioner. In August 1905, the scheme for the reorganization of the Calcutta Police was sanctioned by the Government of India. This is now being gradually introduced. Some of the chief reforms that have so far been effected are the increase of the minimum pay of Native Constables and that of the European Constables, now called Sergeants; the increase in the numbers of Sergeants, Native Constables and of Native Officers, who are now called Head Constables; and the abolition of the system of making deductions from the pay of members of the force on account of the Superannuation Pension Fund, Government having undertaken to pay all pensions and gratuities from general revenues. The total strength of the staff has also been slightly increased.

2. The *morale* of the force appears to be improving. There were fewer dismissals and departmental punishments than last year. The number of members of the force judicially punished has also fallen from 18 to 10 (1 officer and 9 men). It is satisfactory to note that the number of resignations without pension or gratuity has fallen from 321 to 226. Doubtless this is due to the improved prospects of the Police, but some explanation should be forthcoming for the increase in the number of desertions from 50 to 94. Allowing for the increase in the strength of the force, the numbers of the Police, both officers and men, who can read and write, compare favourably with those of last year.

3. There has been a decrease of about 1,500 in the number of true cognizable cases reported direct to the Police and instituted on complaint to a Magistrate. The falling off relates mainly to cases of public nuisances and offences against the Town and Suburban Police Acts during the last four months of the year—a time of considerable public excitement and numerous strikes, when the Police had their hands full of other miscellaneous duties. There has been little fluctuation in the number of cases tried under the Penal Code. It is curious that the decrease in the number of burglaries in the town of Calcutta is almost exactly counterbalanced by the increase in the suburbs. It is reported that this increase, to which attention was drawn last year, is due to the influx of up-country coolies to various works going on in the suburbs. The number of non-cognizable cases instituted shows an increase from 13,859 in 1904 to 15,349 in 1905, of which 9,706 ended in conviction.

4. The percentage of convictions in cases tried by the Presidency Magistrates was high, namely, 84 as compared with 80 and 90 of the two preceding years. The High Court tried 59 cases, and the Alipore Sessions Court 32; 52 and 27 of these cases, respectively, ended in conviction. The Lieutenant-Governor desires to thank the Honorary Magistrates for the valuable assistance rendered by them in the disposal of magisterial business, sometimes at the cost of much personal inconvenience.

5. The Bengal Police, the Calcutta Police and Mr. Knyvett are to be congratulated on the good work done in connection with the investigation and prosecution of the gang of forgers who had for years been perpetrating a series of frauds by means of forged Government Promissory Notes on well-known banks. Professional crime has been adequately dealt with : 308 bad characters and 102 receivers of stolen property were prosecuted and convicted. Three gang cases were prosecuted during the year, two of which ended in conviction, while the third is still pending.

6. The Lieutenant-Governor is pleased to note that vigorous steps are being taken to prosecute fraudulent firms or companies. The principle of having cases against such firms tried in the district where the complainant and the witnesses live will no doubt tend to cause persons who have been defrauded by these bogus firms to come forward with their complaints.

7. The increasing use by Magistrates of section 562 of the Criminal Procedure Code is satisfactory. Sixty-two first offenders were released on probation under this section as compared with 38 of the preceding year. Twenty-seven juvenile offenders were sent to the Reformatory.

8. The system of recording finger-impressions for the purposes of identification continued to give excellent results. The accused were identified in 984 cases by this means as against 917 in 1904 and 897 in 1903. Thirty-two notorious offenders and bad characters were also photographed on release from jail.

9. The figures relating to motor-cars are interesting. One hundred and thirteen private motor-cars and 23 cycles were registered, and 203 drivers' licenses were issued under the Motor Car and Cycle Act during the year. There were four accidental deaths caused by motor-cars, but in each case the driver was exonerated at the inquest from culpable negligence.

10. During the latter part of the year the general unrest, due to the agitation in connection with the partition of Bengal, had to be watched carefully in order to prevent acts likely to disturb the public peace or to interfere with the liberties of others. Sir Andrew Fraser has already intimated his appreciation of the manner in which the officers and men discharged their duties in keeping the peace on the 16th of October.

11. In December Their Royal Highnesses the Prince and Princess of Wales visited Calcutta. The management and conduct of the enormous crowds that visited the metropolis gave the Police a very considerable additional amount of work. Their Royal Highnesses intimated their gracious appreciation of the work done, and Sir Andrew Fraser personally distributed gold and silver tokens to all Superintendents, Inspectors and Sergeants as a memento of the visit, and further sanctioned the distribution of a monetary reward to all Head Constables and Constables who were on duty. Mr. F. L. Halliday, the Commissioner of Police, has also been made a Member of the Victorian Order.

12. The Lieutenant-Governor desires to thank the Commissioner of Police, his colleagues and his subordinates for the good work done by them in the course of the year, and again to express his appreciation of their excellent work as well as that of the other officers attached to the Calcutta Police during the visit of Their Royal Highnesses the Prince and Princess of Wales. The names of those officers who have been specially mentioned have been noted.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Commissioner of Police, Calcutta, for information and guidance.

Ordered also that a copy of the Resolution be forwarded to the Chief Presidency Magistrate, Calcutta, the Commissioner of the Presidency Division, the Chairman of the Corporation of Calcutta, and the Municipal Department of this Government for information.

Ordered also that a copy of this Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal;

R. W. CARLYLE,
Chief Secretary to the Govt. of

GENERAL SUMMARY.—Rain was general all over the Province, and for the most part moderate except at Darjeeling, where it was heavy. The rainfall of the week has done much good by facilitating ploughing and sowing, but more rain is generally needed. Weeding of jute and sugarcane and sowing of paddy are going on. Prospects on the whole improved. Test relief work has been started in Nadia on account of the distress in thana Gangani. Distress is reported in parts of Jessore. Cattle-disease is reported from eight districts. Fodder and water are sufficient. The price of common rice has risen in ten districts and fallen in one. It continues high in most districts.

The mean pressure, temperature, &c., are deduced from the traces of the barograph and thermograph and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground. The rainfall reported on any day is for 24 hours preceding 8 A.M. of that day.

o, overcast; t, thunder; d, drizzling rain; p, passing temporary showers.
